DETAILED ACTION

1. This action is responsive to communications: Application filed on 01/20/2000.
2. IDS filed on 01/20/2000.
3. Claims 1-16, are pending in this case. Claims 1, 9, 16 are independent claims.
4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. Claims 1-6, 9-14, and 16 objected to because of the following informalities: can not include "number" embedded within a claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1 – 16, are rejected under 35 U.S.C. 102(e) as being anticipated by Cragun et al. U.S. patent No. 6,161,112.

Regarding independent claims 1 and 9, Fig. 1 of Cragun discloses a system for customizing a Web page by using at least one computer (100) on which a browser (126) for browsing a Web page runs, said system comprising the means for: requesting a Web page to be customized (Fig. 4 [420]); receiving said requested Web page (Fig. 1 [128]) in which a program for customizing a page is embedded (129) displaying said received Web page by a browser (see Fig. 6); having said program display a control panel for a customizing operation (Figs. 11 and 12); and customizing a Web page according to a customizing operation by a user using said control panel (Figs. 11 and 12).

Regarding claims 2 and 10, Cragun discloses said means for requesting a Web page is a means for requesting a page from a Web server via a server or for requesting a locally stored Web page (see Fig. 5).

Regarding claims 3 and 11, Cragun discloses said system further comprises the means for: storing data on a customizing operation (see Fig. 1 [130]).

Regarding to claims 4 and 12, Cragun discloses said means for storing data on a customizing operation is a means for storing said data on a server (inherently included in Fig. 5).

Regarding claims 5 and 13, Cragun discloses said system further comprises the means for multiple users with multiple computers for customizing the web pages (col. 4 lines 8 – 10).

Regarding claims 6 and 14, Cragun discloses said system further comprises the means for: from said another computer, further customizing a Web page according to a customizing operation by a user using said control panel (see Figs. 11 and 12).

Regarding claims 7 and 15, Cragun discloses said program is described in a program not dependent on any operating system nor browser (col. 11 lines 20 – 22).

Regarding claim 8, Cragun discloses said system comprises a means for immediately reflecting a result of a customizing operation on a browser (Fig. 5[126]).

Regarding claim 16, a computer program incorporates substantially similar subject matter as claims 1 and 9, and is rejected along the same rationale.
